

AKRIS

Drawing back to the minimal looks of 90's , Akris has no-frills looks for fall and are the epitome of modern glamour. Leather grabs the spotlight for fall 2014, accented with chic tops, and leather skinny pants. Textural, touchable quilting, laser cut fabric layered over only the finest of silks brings this collection to a whole new level. It will attract the woman who in touch with style and grace. The looks have a minimalist, sporty theme, and an emphasis on layering different textures and fabric. Akris made a point to use a plethora of different fabrics: suede, cotton, crepe, wool, and leather, leather, leathern accents with sophisticated belts. Sport jackets and synthetic fabrics give off a chic vibe, and were spruced up with colored pieces layered over or under. It is no secret that leather, in every color, is a huge trend for both this fall and also next spring/summer.
